**National Grid's
Transmission Pricing Proposal**

**Cost Causation/
Direct Assignment**

Generator direct
Interconnection
facilities

A portion of new
looped switchgear
for generator
interconnection

Upgrades out of a
subregion subject
to the 10% test

Upgrades needed
for exports out of
RTO

Voluntary requests
for upgrades in
return for
incremental CRRs

Merchant
Transmission and
other bilateral
agreements

**Zonal
Rolled-in Rates**

Remaining cost of
looped Switchgear
(if not fall in the
regional rate)

Existing facilities'
transitional zonal
scheme if so agreed
by the region

Radials to
load connection
points

Lower voltage
network facilities
(let regions decide
the voltage level)

Higher voltage
transmission when it
can be clearly
shown that only one
zone uses.

**Regional
Rolled-in Rates**

All higher voltage
network facilities
not included in the
zonal rates or in
cost causation/
Direct Assignment
category.
